# EDUCATION & TRAINING

Education is an important part of keeping workers healthy and safe. Our occupational health and safety specialists lead seminars and trainings on a variety of topics with a focus on preventing workplace injuries and illnesses. These programs can be tailored to address the specific needs of workers and supervisors in various industries such as construction, health care, manufacturing, transportation, and professional and technical services.

## Program

- Group or individual sessions remotely or in person
- Flexible scheduling at your preferred location
- Participant evaluation forms to assess learning outcomes

## Trainers

Occupational medicine physicians, nurses, industrial hygienists, and ergonomists lead trainings in their areas of expertise.
